

BIRDCOMB

PURPOSE: Birdcomb creates ventilation by allowing airflow into the roof space and also stop birds and insects entering the void. A comb strip barrier that is designed to prevent the entry of birds, large insects, and vermin into the roof void. The strip's flexible teeth adjust to fill the gaps beneath profiled tiles at the eaves.

SUITABLE FOR:

- Use with all profiled tiles.
- Pitches between 15 – 50 degrees.

BENEFITS:

- Flexible and durable.
- Easy to install.

QUALITY STANDARDS:

Satisfies all NHBC requirements.

COLOUR: Black

MATERIAL: Polypropylene

SIZE: 1000 mm lengths

LENGTH: 1000 mm

WIDTH: 28 mm
